

# BUILD YOUR OWN SHIELD

Cut out around the outline and then fold all the fold lines. Apply glue or sticky tape onto flap A and B. Stick flaps A and B onto the reverse side of the shield. Fold flap C towards the shield to reinforce the base. Your shield is now ready to be displayed.

— = a line to cut

— = a line to fold

## CONGRATULATIONS

You have found the Golden Shield.

You have proven yourself to be brave, clever, determined and resourceful.

You are one of the few and can be considered mighty indeed.

I suggest you cut out and make your shield and display it somewhere in your house, so that all who visit can see just how worthy you really are.
